

# USER MANUAL

## KWL24-110

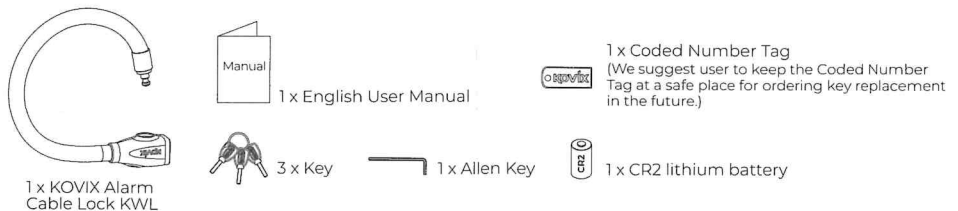

### FEATURES

- Easy and strong to lock your bike
- PVC cover resists corrosion from water, dust and dirt to prolong the life of your lock
- 120 dB on/off alarm system

### BEFORE YOU START

To use KOVIX KWL Series, check if you have the following ready:

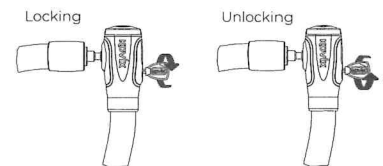

### HOW TO USE KOVIX KWL CABLE LOCK

#### Lock with Alarm

1. Insert locking pin to hole.
2. Insert key and turn the key clockwise to lock; you should hear ONE beep sound while locking.
3. The lock will emit a long beep sound after 3 seconds to confirm alarm activation.
4. If movements are detected, the lock will emit 5 beeps as a warning. If movements persist, the lock will emit its 120dB alarm siren for 10 seconds.
5. Auto re-alarm function - The lock will re-alarm automatically if movements are detected continuously.
6. To unlock, insert the key and turn the key anti-clockwise.

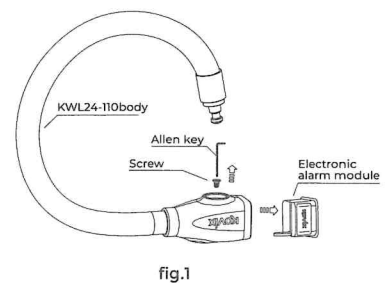

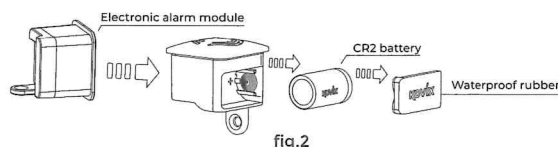

#### Lock without Alarm

1. Insert locking pin to hole.
2. Turn the key clockwise to lock; you should hear TWO beeps sound while locking.
3. To unlock, insert the key and turn the key anti-clockwise.

### REPLACING THE BATTERY

1. Unlock the lock.
2. Using the provided Allen key, remove the screw from the electronic body. Please refer to fig.1 for clarification.
3. Remove the electronic alarm module from the body.
4. Open waterproof rubber, and insert fresh CR2 lithium battery. Please refer to fig.2 for clarification.
5. Reassemble parts carefully to finish, make sure that the waterproof rubber tightly covers the battery.

\* The average lifespan of our CR2 lithium battery is one month to a year. Factors such as extreme temperature and high frequency of usage could reduce its lifespan.

### TROUBLE SHOOTING

- 1) **Alarm not working:** Check if the battery is placed properly and make sure the + - signs are positioned correctly. If the battery is dead, please change the battery.
- 2) **Lost Key:** Contact local distributor with the Coded Number Tag for key replacement.
